DATE: TUESDAY, 10 MARCH 2026

TIME: 12H30 – 13H30

PLATFORM: TEAMS

Speaker

Professor
CATHY SUTHERLAND,
University of KwaZulu-Natal

**COMMUNITY-BASED FLOOD EARLY
WARNING SYSTEMS AS URBAN REFORM
COALITIONS: LEARNING FROM DURBAN**

Cathy Sutherland is an urban geographer based in Durban, South Africa, and a Professor in the School of Agriculture and Environmental Science at the University of KwaZulu-Natal. She specialises in environmental, water and climate governance in cities of the global South, with a particular focus on informal settlements and peri-urban areas. Her work involves social and environmental assessments of development interventions in urban and rural spaces, including innovative water and sanitation technologies, informal housing upgrades, socio-ecological restoration and climate adaptation initiatives.
